# 《高中英语》（上外版）

## 选择性必修第一册第四单元

课时	授课内容
1	Getting Started/ Reading A
1	Reading A/ Vocabulary Focus
1	Grammar in Use
1	Listening, Viewing and Speaking
1	Reading B
1	Writing
1	Critical Thinking
1	Further Exploration

# 学习目标 Learning Objectives:

**At the end of the lesson, you will be able to ...**

1. 概括出科幻小说的文体特征;  
figure out the organization and the general features of science fiction;
2. 梳理出语篇中对未来生活各个方面的构想;  
sort out all the aspects of future life in the text;
3. 推断作者对未来生活的态度并分享自己的观点。  
infer the author's attitude towards future and share your own opinion.

# Make predictions

My lights turn on automatically. It's 6.50 a.m. and the house is waking me up. Still sleepy, I find my uniform in the wardrobe and put it on. It had been washed, ironed, and hung up the night before by Lina X15 — my family's housekeeper. When I was younger, she was my nanny. She's been with me all my life. My parents didn't have time for children then and Lina, advertised as a reliable helper, looked after me. That's why my parents bought her. Almost everyone has an X15 today.

I enter the kitchen. My breakfast sits there, waiting for me. Always the same. Planned, with a controlled quantity. The government says our planet can't deal with overpopulation. Food is grown in laboratories, and every house receives just enough food — no more, no less. Mum always talks about the old days when people had vegetable gardens and could go to the market to buy food. Animals actually lived in the wild and not in carefully controlled zoos. It's all I've ever known.

Robots are everywhere now; they are usually referred to as "zoids." When they first came on the market in 2030, everyone wanted one. Now, twenty years later, they've taken over. They do almost everything. They work in labs and factories, fix teeth and perform surgeries. My dad used to

be a surgeon before they found that "zoids" could do surgery better than humans. Less room for error, I guess.

I walk to the window and look out over the landscape. All I see are buildings and interconnecting tunnels. Grey skyscrapers, all identical. I can spot my school — it is just over to the right, but it looks the same as every other building. Today we are having a lecturer from Los Angeles speak to us about the extinction of different species of animals, like the polar bear and the elephant. I find it strange that even with all our technology, we couldn't save them.

I feel a tap on my shoulder. I turn around.

"It's time for school," Lina says, her metallic voice echoing around the room. "Don't be late."

"On my way," I reply. "I'll be back by 6 p.m."

I rush out the door and go down 60 floors to join the other children in my building. We've always walked through the tunnels to get to school. We've always breathed recycled air. We are children who have never been outside. I wonder what it's like. Perhaps Lina can explain it to me.

## Summarize the 5 aspects

# Predictions about the future

Aspects of future life	Predictions
Future housework	
Future food	
Future jobs	
Future buildings	
Future environment	

Aspects of future life	predictions
Future housework	Robots will do most of the housework.

5 My lights turn on automatically. It's 6.50 a.m. and the house is waking me up. Still sleepy, I find my uniform in the wardrobe and put it on. It had been washed, ironed, and hung up the night before by Lina X15 — my family's housekeeper. When I was younger, she was my nanny. She's been with me all my life. My parents didn't have time  
 10 for children then and Lina, **advertised as a reliable helper**, looked after me. That's why my parents bought her. Almost everyone has an X15 today.

**advertise** v. to tell the public about a product or service in order to encourage people to buy or use it.  
**advertisement** n.

**reliable** *adj.* that can be trusted to do sth. well that you can rely on.  
 a reliable friend/ supporter

**a reliable  
helper  
convenience**

**lack of  
communication**

Aspects of future life	predictions
Future jobs	Robots will do almost everything. They will work in labs and factories, fix teeth and perform surgeries.

Robots are everywhere now; they are usually referred to as “zoids.”

30 When they first came on the market in 2030, everyone wanted one. Now, twenty years later, they’ve taken over. They do almost everything. They work in labs and factories, fix teeth and perform surgeries. My dad used to be a surgeon before they found that “zoids” could do surgery better than humans. Less room for error, I guess.

35

**less room of error**

**lack of creativity**  
**unemployment**

Aspects of future life	predictions
Future buildings	Future buildings will be grey identical skyscrapers interconnected by tunnels.
Future environment	

I walk to the window and look  
 40 out over the landscape. All I see are  
 buildings and interconnecting tunnels.  
 Grey skyscrapers, all identical. I can

**identical** *adj.* similar in every detail

us about the extinction of different  
 species of animals, like the polar bear  
 and the elephant. I find it strange  
 50 that even with all our technology, we  
 couldn't save them.

I feel a tap on my shoulder. I turn around.

Aspects of future life	predictions
Future buildings	Future buildings will be grey identical skyscrapers interconnected by tunnels.
Future environment	Many species of animals, like the polar bear and the elephant, will be extinct. People will have to breathe recycled air.

I walk to the window and look  
 40 out over the landscape. All I see are  
 buildings and interconnecting tunnels.  
 Grey skyscrapers, all identical. I can  
 spot my school — it is just over to the  
 right, but it looks the same as every  
 45 other building. Today we are having  
 a lecturer from Los Angeles speak to  
 us about the extinction of different  
species of animals, like the polar bear  
and the elephant. I find it strange  
 50 that even with all our technology, we  
couldn't save them.

I feel a tap on my shoulder. I turn around.

"It's time for school," Lina says,  
 55 her metallic voice echoing around the  
 room, "Don't be late."

"On my way," I reply. "I'll be back by 6 p.m."

I rush out the door and go down  
 60 60 floors to join the other children  
 in my building. We've always walked  
 through the tunnels to get to school.  
 We've always breathed **recycled** air.

**Recycle** v. to treat things that have already been used so that they can be used again.

# Discussion

Is the author optimistic or pessimistic about the future ? How did you know that? What's your opinion?

Predictions about the future	
Aspects of future life	Predictions
Future housework	Robots will do most of the housework.
Future food	Food is grown in laboratories, and every house receives just enough food — no more, no less.
Future jobs	Robots will do almost everything, They will work in labs and factories, fix teeth and perform surgeries.
Future buildings	Future buildings will be grey identical skyscrapers interconnected by tunnels.
Future environment	Many species of animals, like the polar bear and the elephant, will be extinct. People will have to breathe recycled air.

# Assignment

**Complete “READING AND VIEWING” on P57-59 in your workbook.**

Thank you!
