

上外版 高二年级 选择性必修二 第四单元
第六课时 学案（教师版）

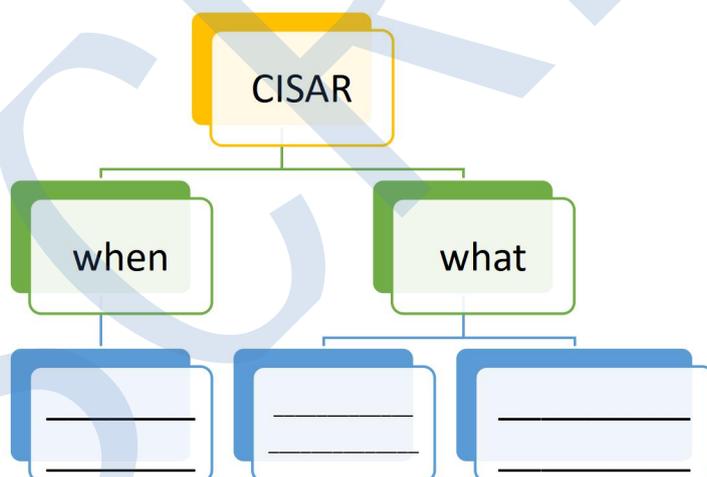

Learning Tasks

Task 1: Create a personal emergency plan to be better prepared for a disaster which is most likely to hit the place where you live.

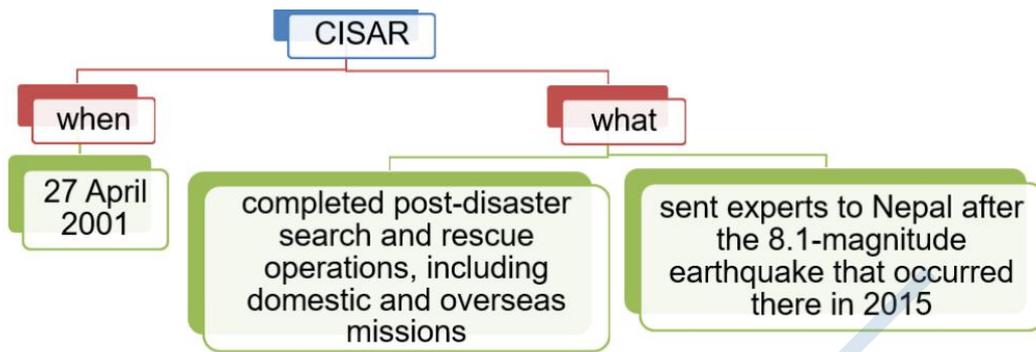

An emergency plan		
Before the disaster	During the disaster	After the disaster
Preparations:	Measures:	Measures:

My plan mainly focuses on preparations before the fire. First, be sure to gather the following items to ensure your basic comfort and well-being, including a flashlight, a filter mask, moist towels. Second, you'd better be familiar with the evacuation routes of all the buildings in your school, whether it is in the dormitory or the teaching building. Third, you should take courses to enrich your knowledge of fire prevention, for example, how to use a fire extinguisher. Finally, fire drills are a must to help you assess and adjust your preparedness.

Task 2: Read the culture links and fill in the blanks.

CISAR was founded on 27 April 2001. It has completed a lot of missions, such as post-disaster search and rescue operations. In 2015 it sent experts to Nepal after the 8.1-magnitude earthquake that occurred there.

Assignments:

1. Finish the integrated exercise in the workbook on P66.
2. Watch a video called *7 Ways to Survive Natural Disasters* and finish the speaking task in the textbook on P59.
